

Preparing for Your Painting Project

To help our team work efficiently and protect your belongings, please prepare each room before we arrive.

- Move all furniture and belongings at least **3 feet away from the walls (preferred 4)**.
- If painting the ceilings, group your belongings into stacks no wider than **3 feet**.
- Leave **3 feet of space** between each stack and between the walls and the first stack, as shown in the photo below. This allows us to move throughout the room and access above each section.
- Please remove fragile items, valuables, and wall décor before our arrival.

Thank you for helping us create a safe and efficient workspace!
